PROFESSIONAL SUMMARY

Passionate and hands-on cybersecurity enthusiast with proven skills in web and network penetration testing, currently pursuing a Bachelor's in Software Engineering. Seeking to leverage my technical foundation, real-world tool experience, and offensive security mindset in an internship at Securetackles to contribute meaningfully while learning from experienced professionals.

TECHNICAL SKILLS

Offensive Security & Red Teaming

- Manual & automated web app exploitation, focused on XSS (Reflected)
- Network spoofing & WiFi attacks using Bettercap, Airgeddon, Wifite

Tools & Scripting

- Burp Suite, WPScan, FFUF, WhatWeb, Nmap, Wireshark, Nikto, Katana, Reaver, Hashcat
- Python, Bash, Regex — developed automation scripts for spoofing, parsing, and data extraction

Research

- Authored investigative report on Dark Web identity theft in Pakistan

CERTIFICATIONS

1. **Google Cybersecurity Professional Certificate**
   - Python for Security Tasks, Log Analysis, Regex Parsing, Debugging
   - Focused Labs: Access Control Files, IP Parsing, Security Automations
2. **Certified Network Security Practitioner (CNSP)**
3. **Certified AppSec Partitionar (CAP)**

5. **Cybersecurity Essentials – Cisco**

EDUCATION

Bachelors in Software Engineering Expected: 2027

- Sindh Madressatul Islam University Karachi, Main Campus

PROJECTS

- **Custom Spoofing Script (Bettercap-based)**
  Built a guided tool for MITM attacks with user-driven input (interface, domain, target, spoofing automation)
- **kravemart.com Vulnerability Assessment (2025)**
  Performed detailed assessment using FFUF, WPScan, WhatWeb. Analyzed plugin and theme vulnerabilities, login exposure, and XSS vectors.
- **Dark Web Research Project**
  Investigated how Pakistani personal data appears on the dark web, citing case studies, cybercrime reports, and interviews.
